## Silent Spectrum Group LLC

INTELLIGENCE. STRATEGY. ADVANTAGE.

### Company Snapshot

Silent Spectrum Group is a veteran-owned defense consulting company providing mission-focused consulting, training, and scenario development support across intelligence, electronic warfare, RF analysis, and red team environments. Public-facing material is intentionally broad and unclassified.

### Core Capabilities

#### SIGINT / RF Analysis

Tactical signals intelligence support, RF environment awareness, signal correlation, and operational intelligence integration.

#### Electronic Warfare Support

Electromagnetic spectrum operations support, EW planning concepts, threat replication, and training environment development.

#### Red Team Scenarios

Adversary behavior, OPFOR concepts, training injects, red-cell scripting, and mission-relevant scenario design.

#### Technical Training

Instructor-led training, curriculum development, course execution, student evaluation, and after-action support.

#### Mission Planning Support

Operational planning support, intelligence product development, reporting, briefings, and decision-maker support.

#### Cyber / RF Training Environments

Beginner-to-intermediate cyber and RF training concepts, wireless security awareness, and range development support.

### Differentiators

- Veteran-owned and operationally grounded.
- Bridges instructor, analyst, and mission support roles.
- Strong fit for discreet, unclassified customer-facing support.
- Focused on practical training outcomes, not generic templates.

### Relevant Experience

- Tactical SIGINT and RF analysis support.
- OPELINT, radar tracking, and signal correlation exposure.
- SOF-aligned course support and technical instruction.
- Targeting-cell support through research, products, and briefs.
